GENERAL INDEX TO VOLUME II.

Academy of Sciences, The Chicago—(notes).....239, 335
The New York—(note)..... 427
Adjusting, Putting in place and—the object-glasses of refracting telescopes, J. A. Brashear..... 57
Agricultural College of S. D., Observation of the transit of Mercury Nov. 10-11, '94 at—(note)..... 188
Algol type, Variable stars of the—for July and Aug, J. A. Parkhurst.....468
Almanacs, R. W. McFarland.....I, 225; II, 358; III, 452
Amateur astronomers, Groups of time-stars for—, E. Iliff and L. Waterbury. 74
Amateurs, Cleaning of object-glasses by—(note)..... 88
Americans guilty? (note)..... 431
Ammonia, Note on the use of—for cleaning polished surfaces (note)..... 281
Analytic geometry, (book notice)..... 48
Ancient times, Sirius in—, T. J. J. See..... 193
Apertures required to show stars of given magnitude (query)..... 42
Arago medal..... 33
Aratus (query)..... 470
Arnold, F. F., Aurora (note)..... 91
Causes of unequal efficiency of inner and outer portions of an objective (note)..... 90
Short-focus refractor (note)..... 90
Asteroids, The number of the—(note)..... 430
Astrolabe, M. L. Huggins.....I, 199; II 261
Astrology, Almanacs IV;—R. W. McFarland..... 452
Astronomical and physical society of Toronto (notes).....192, 431, 473
ephemerides, J. Morrison..... 301
photography, Progress of—, H. C. RussellI, 101; II, 170; III, 310; IV..... 457
program for 1895, C. A. Young..... 308
spectroscopy, (book notice)..... 144
society of Wales, Journal of the—(note)..... 471
Astronomische chronologie, (book notice)..... 336
Astronomy, Making—popular, M. Proctor..... 418
Astronomy, Services of Nathaniel Bowditch to American—, T. J. J. See..... 385
Spectroscope in,--T. Reed.....I, 297; II, 402
Study of—neglected (note)..... 431
Study of physical—; suggestions to students and amateurs, T. J. J. See..... 249
Summer school of—(note)..... 471
Astrophysical Journal (note)..... 283

Atlas, A convenient naked-eye star—, (note) 47
Higgs' photographic—of the normal solar Spectrum, (query) 140
Atmosphere of Mars, P. Lowell 154
Attempts to photograph the sun, W. W. Payne 116
Aurigæ, Nova—E. E. Barnard 307
Aurora (note) 91
The—and sunspots (note) 88
for June (note) 471
Axis, Position of the earth's—, O. E. Harmon 219
Barnard, E. E., A new determination of the Saturnian ball and ring system with the great Lick telescope 295
Gift of—to Royal Astronomical Society (note) 141
Great meteor of July 27, 1894 (note) 142
Nearer to the stars 245
Nova Aurigæ 307
Observations of the transit of Mercury, Nov. 9-10, 1894 168
Photographs of the August meteors (note) 47
The great photographic nebula of Orion encircling the belt and theta nebula 151
The great red spot and other markings on Jupiter 126
Measures of the south polar caps of Mars 433
Barnard's comet (1884 II), H. C. Wilson 321
(note) 189
Search ephemerides for— 382
Behr, A. C., Reflectors for planetary details (note) 334
Sunspots and the aurora (note) 88
Bibliography of astronomy 96, 192, 240, 432
Blue book of amateur photographers (book notice) 336
Book notices:
Astronomical spectroscopy, J. Scheiner 48
Cyclopaedic photography, E. L. Wilson 48
College algebra, E. A. Bowser 48
Plane and solid geometry, E. A. Bowser 48
Analytic geometry, E. A. Bowser 48
An exercise book in algebra, M. S. McCurdy 142
Star names and meanings, R. H. Allen 144
Solid geometry, A. L. Baker 144
Astronomical Spectroscopy, J. Scheiner, English trans. by E. B. Frost 144
Principia Nova Astronomica, H. Pratt 144
A few chapters in astronomy, C. Kennedy 287
The planet earth, R. A. Gregory 288
Radiant stars, A. Giberne 288
A treatise on plane and spherical trigonometry, E. Miller 336
Astronomische chronologie, W. F. Wislicenus 336
The blue book of amateur photographers, W. Sprague 336
Elements of astronomy with numerous examples and examination papers, Geo. W. Parker 432
Catalogne of chemical and biological apparatus, Max Kaehler & Marlini. Connaissance des Temps 474
Books on celestial objects for common telescopes (query) 425
Bowditch, The services of Nathaniel—to American astronomy, T. J. J. See 385

Brashear, J. A., Best method of cleaning a diffraction grating (note)..... 190
Effect of moisture on lenses (query)..... 87
Foucault's test for concave surfaces (note)..... 425
Glass discs for specula (note)..... 425
Loss of light by reflection in telescopes (query)..... 86
On the care and cleaning of object glasses..... 9
Putting in place and adjusting the object glasses of refracting telescopes..... 57
Relative power of reflectors and refractors (note)..... 43
Silvered mirrors (note)..... 280
British astronomical association (note)..... 471
Brooks, W. R., Brook's periodic comet V 1889 (note)..... 474
Calendar of the mound builders, Supposed discovery of the—(note)..... 429
Canals of Mars, P. Lowell..... 255
(query)..... 329
Care and cleaning of object glasses, J. A. Brashear..... 9
Carlyle and the constellations (note) 426; (query)..... 470
Catalogues, Durchmusterung star—(query)..... 425
Central Tennessee school of mechanical engineering (notes)..... 192, 240
Ceti, Omicron— (note)..... 427
Chabot observatory, Observation of the transit of Mercury, Nov. 10-11, '94 at—(note)..... 188
Chamberlin observatory, Observations of the occultation of the Pleiades at —(note)..... 334
Chicago academy of sciences (notes)..... 239, 335
Cleaning, Care and—of object glasses, J. A. Brashear..... 9
diffraction grating, Best method of—(query)..... 190
object glasses, Method of—(queries)..... 87
of object glasses by amateurs (note)..... 88
polished surfaces, Note on the use of ammonia for—(note)..... 281
Climate of Mars, M. Manson..... 371
College algebra (book notice)..... 48
Comet *b*, 1894 (Gale's) (note)..... 44
Barnard's periodic—1884 II, H. C. Wilson..... 321
1884 II (Barnard), The next return of—(note)..... 189
e, 1894 (E. Swift) (note)..... 234
e, 1894 and the lost comet of DeVico, 1844 I, H. C. Wilson..... 241
e, 1894, Discovery of—(notes)..... 189, 236
Encke's—(notes)..... 234, 236, 279, 280, 333
—(note and ephemeris)..... 234
Lost—of De Vico 1884 I and comet *e*, 1894, H. C. Wilson..... 241
Notes..... 189, 234, 279, 333, 384, 424
Rediscovery of Encke's—(note)..... 189
Search ephemerides for Barnard's—1884 II..... 382
seeker (query)..... 41
Brook's periodic—V 1889 (note)..... 474
Rordame, W. J. Hussey..... 445
Comets of the year 1894..... 384
Spectra of—(queries)..... 330
The photography of—with notes concerning comet Rordame, W. J. Hussey..... 353
Companion of Polaris (note)..... 95

Concave surfaces, Foucault's test for—(query) 425
Constant *k* (query) 189, 281, 383
Constellations, Carlyle and the—(note) 426; (query) 470
Copeland, J. A., Astronomical and physical society of Toronto (note) 192
Copyright with reference to translations from foreign publications (query) ... 44
Crusinberry, W. A., Drake Observatory (note) 285
Davidson, G., Transit of Mercury observed at Davidson Observatory (note). 186
observatory, Transit of Mercury Nov. 10-11, 1894 observed at—(note) 186
Dearborn Observatory, Observation of transit of Mercury Nov. 10-11, '94 at —(note) 188
De Vico, The lost comet of—1844 I and comet *e*, 1894, H. C. Wilson 241
Diameter of Neptune (note) 428
Diffraction grating, Best method of cleaning—(query) 190
Discovery of comet *e*, 1894 (E. Swift) (notes) 189, 236
return of Encke's comet (note) 189
Douglass, A. E., Gegenschein observations 29
The Lowell observatory and its work 395
Drake observatory (note) 285
Draper's, silver-on-glass specula (query) 425
Durchmusterung star catalogues (query) 425
star charts (note) 473, (query) 470
Earth's axis, Position of the—, O E. Harmon 219
motion, Visualizing the—(note) 46
Easy way to make a noon mark, E. Riggs 73
Eclipse of the moon, A partial—Sept. 14, 1894 (note) 38
of the moon, Mar. 10, 1895 (notes) 284, 384
of the sun, A total—Sept. 28, 1894 (note) 40
of the sun March, 1895 (note) 284
of the sun, Meteors observed during a total—(note) 332
Eclipses in 1895 (note) 237
Ecliptic, Pole of the—(query) 425
Edgecomb, D. W., Reflectors 366
Electric light, Battery for—of one candle power (query) 87
Elements of astronomy with numerous examples and examination papers (book notice) 432
Spectra of the—J. E. Keeler 20
Elementary text-book, Popular astronomy as a supplement to the— 456
Elkin, W. L., Instrument for the photography of meteors for the Yale Observatory 17
Encke's comet (notes) 189, 234, 236, 279, 280, 333
comet (note and ephemeris) 234
comet, Rediscovery of—(note) 189
Ephemerides, Astronomical—, J. Morrison 301
Search—for Barnard's comet 1884 II 382
Ephemeris (query) 191
Finding—for comet 1889 V 424
of Encke's comet for January and February '95 (note) 235
The solar—, J. Morrison 406
Errata 141
Eruptive solar prominence (June 7, 1894) (note) 45
Exercise book in Algebra (book notice) 142

Extent of the universe (query) 425
Eye pieces, Manipulation of—(note) 139
Few chapters in Astronomy (book notice) 287
Fixed stars, W. H. S. Monck ..... IV, 60, V, 108
Folk-Lore astronomy, L. P. Venen 32
Formulæ involving "k," Explanation of—(query) 189, 281
Foucault's test for concave surfaces (query) 425
Gale's comet (b 1894), (note) 44
Gegenschein, Cause of the—(note) 94
Illustration of the principle of the—(note) 87
observations, A. E. Douglass 29

Principia nova astronomica (book notice)..... 144
Prism, The objective—(query)..... 330
Prize, Prof. Geo. E. Hale awarded the Janssen—(note)..... 331
Prizes, Astronomical Journal—(note)..... 474
Proctor, M., Making astronomy popular..... 418
Program, The astronomical—for 1895, C. A. Young..... 308
Progress of astronomical photography, H. C. Russell, I, 101; II, 170; III, 310 IV..... 457
Prominence, Eruptive solar—(June 7, 1894) (note)..... 45
Pronunciation of star names derived from the Arabic, R. H. West..... 209
Publishers' notices, 48, 144, 192, 240..... 471
Putting in place and adjusting the object-glasses of refracting teleseopes, J. A. Brashear..... 57
Pyrois, Mars and—(note)..... 238
Radiant stars (book notice)..... 288
Recent observations of the satellites of Jupiter, W. H. Pickering..... 121
Rectilinear motion (query)..... 470
Red-spot, The great—and other markings on Jupiter, E. E Barnard..... 129
Reed, T., The spectroscope in astronomy,..... .....I, 266; II, 297; III, 402
Reflection, Loss of light in telescopes by—(query)..... 86
Reflections or "satellites" shown by a common mirror (note)..... 89
Reflectors, D. W. Edgecomb..... 366
and refractors (note)..... 427
for planetary details (note)..... 334
Relative power of—and refractors, (query)..... 43
Refractor, Short-focus—(note)..... 90
Refractors and reflectors (note)..... 427
and reflectors, Relative power of—(query) 43
Region of Lacus Solis, J. M. Schaeberle..... 72
Re-organization of the U. S. Naval observatory (note)..... 91
Riggs, E., An easy way to make a noon mark..... 73
An illustration of the principle of the Gegenschein (note)..... 87
Rogers, W. A., Meaning of the constant "k" (notes).....281, 383
Note on the use of ammonia for cleaning polished surfaces (note)..... 281
Rordame, The photography of comets with notes concerning comet—, W. J. Hussey..... 353
Comet—, W. J. Hussey.. 445

Royal astronomical society, E. E. Barnard's gift to—(note) 141
Russell, H. C., Progress of astronomical photography 101, 170, 310, 457
Satellite, Naked-eye view of Jupiter's fourth—(note) 333
of Neptune, Dec., 1894, 137; Jan., 1895, 183; Feb. 232
Satellites of Mars, Sept. and Oct., 1894, 38; Nov., ... 84
of Uranus, Apr., 1895, 327; May, 381; June, 424; July 466
Phenomena of Jupiter's—Nov., 1894, 85; Dec., 134; Jan., 1895, 184; Feb., 230; Mar., 277; Apr., 325; May, 379; (note) 471
Recent observations of the—of Jupiter, W. H. Pickering 121
"Satellites," Reflections or—shown by a common mirror (note) 89
Satellites, Saturn's—Apr., 1895, 328; May, 377; June, 422; July 467
Shadows of Saturn's—(note) 139
Saturnian ball and ring system, A new determination of the—with the great Lick telescope, E. E. Barnard 295
Saturn's satellites, Apr., 1895, 328; May, 377; June, 422; July 467
satellites, Shadows of—(note) 139
Schæberle, J. M., The region of Lacus Solis 72
Scheiner's astronomical spectroscopy (book notice) 48
School, Summer—of astronomy (note) 471
Search ephemerides for Barnard's comet, 1884 II 382
Sectional lens (query) 140
See, T. J. J., Sirius in ancient times 193
The work of—(note) 473
The services of Nathaniel Bowditch to American Astronomy 385
The study of physical astronomy:
I. Suggestions to students and amateurs 249
II. Its place in our universities and colleges 289
III. Some points for beginners 337
Services of Nathaniel Bowditch to American astronomy, T. J. J. See 385
Shadows of Saturn's satellites, (note) 139
Short-focus refractor (note) 90
Short period, On the variable stars of—P. S. Yendell, I, 160; II, 202; III, 269; IV 362
Silvered mirrors (query) 280
Silver-on-glass specula, Henry Draper's—(query) 425
Sirius in ancient times, T. J. J. See 193
Sky, The—(query) 329
Snows, The polar—of Mars, P. Lowell 56
The polar—and non-glaciation of Mars, J. R. Holt 78
Solar ephemeris, J. Morrison 406
prominence, Eruptive—(June 7, 1894) (note) 45
Solid geometry (book notice) 144
Spectra of comets (queries) 330
of the elements, J. E. Keeler 20
Spectroscope and some of its applications, IV. The spectra of the elements J. E. Keeler 20
in astronomy, T. Reed, I, 266; II, 297; III 402
Spectrum, G. Higgs' photographic atlas of the normal solar—(query) 140
Specula, Glass discs for—(query) 425
Speed of light (query) 138
Sperra, W. E., Bright meteor (note) 45
Encke's comet (note) 333

Gales comet (*b* 1894) (note) 44

Visibility of companion of Polaris (note) 40
Sprague, R., Naked-eye observations of Venus (note) 287
Spring phenomena of Mars, P. Lowell 97
Star atlas, A convenient naked-eye—(note) 47
chart (query) 426
names, Pronunciation of—derived from the Arabic, R. H. West 209
names and meanings (book notice) 144
Stars, Appearance at zenith compared with that at horizon (query) 383
Nearer to the—E. E. Barnard 245
The fixed—W. H. S. Monck IV, 60; V 108
Variable—of short period, P. S. Yendell, I, 160; II, 202; III, 269; IV 362
Variable—of the Algol type for July and August, J. A. Parkhurst 468
Steward, J. F., A remarkable flash of lightning (note) 89
Stonyhurst college observatory (note) 429
Study of astronomy neglected (note) 431
of physical astronomy (note) 384
of physical astronomy, T. J. J. See.
I. Suggestions to students and amateurs 249
II. Its place in our universities and colleges 289
III. Some points for beginners 337
Suggestions for spring and summer work on long period variables, J. A. Parkhurst 415
to observers of variable stars, P. S. Yendell 12
to students and amateurs; the study of physical Astronomy T. J. J. See 249
Sun, A total eclipse of the—Sept. 28, 1894 (note) 40
Attempts to photograph the—, W. W. Payne 116
Eclipse of the—March 1895 (note) 284
Meteors observed during a total eclipse of the—(note) 332
Sunspot, The large—of August, 1894, H. C. Wilson 49
Sunspots (note) 134
and the aurora (note) 88
Swift, L., Encke's comet (note) 236
Observations at Lowe observatory (note) 236
Swift's comet (*e*, 1895) (notes) 189, 234, 236, 279
Telescope, Choice of—(query) 44
for the Illinois Wesleyan University (note) 141
Hints for a small—F. E. Harpham 106
Telescopes, Books on celestial objects for common— 425
Loss of light in—by reflection (query) 86
Putting in place and adjusting the object glasses of refracting—J. A. Brashear 57
Size of—of Goodsell Observatory (query) 140
Tempel (note) 141
Time stars, Groups of—for amateur astronomers, E. Iliff and L. Waterbury. 74
Time, Lecture on electrical distribution of—(note) 470
Toronto, Astronomical and physical society of—(notes) 192 431
Transit, Observations of the—of Mercury, Nov., 9-10, 1894, E. E. Barnard. 168
of Mercury, Nov. 10 11, 1894 (notes) 93, 185, 186, 187, 188, 189, 232, 233 430

Transits of Mercury in 1661 and 1664 (note) 284
Treatise on plane and spherical trigonometry (book notice) 336
Universe, Extent of the—(query) 425
Universities and colleges, The place of the study of physical astronomy in our—T. J. J. See 289
Uranus, Satellites of—Apr. 1895, 327; May, 381; June, 424; July 466
Variable stars IX, J. A. Parkhurst 18
stars, Observed maxima and minima of—J. A. Parkhurst 472
stars (note) 95
stars, Maxima and minima of—Sept. and Oct., 1894, 37; Nov., 83; Dec 136
stars of the Algol type, Minimum of—Sept. and Oct., 36; Nov., 84; Dec 137
stars of short period, P. S. Yendell, I, 160; II, 202; III, 269; IV 362
stars, Suggestions to observers of—P. S. Yendell 12
Variables, Long period—J. A. Parkhurst, 215, 316 415
Long period—for July and August 469
of the Algol type for July and August, J. A. Parkhurst 468
Variation of the latitude, Laplace on the—A. B. Hancock 349
